PROJECT NAME: BridgeAI

TEAM MEMBERS: Popescu Miruna-Alexandra
Gae Octavian-Ionuț

IDEA IN SHORT: An AI-driven hardware consultant that simplifies tech shopping by translating complex specs into personalized product recommendations and interactive comparisons.

Hardcore Entrepreneur hackathon 6.0

1.PRODUCT - PROBLEM WE SOLVE

The **Technical Language Barrier**, the **Tedious Search Process**, and **Decision Paralysis** that inexperienced people may encounter during their quest to buy new tech products.

2. OUR TARGET GROUP & SDGs

- **Teens**
- **Adults**
- **The Elderly**
- **Inexperienced people**
- **GOAL 8 & 9**

3. SMART OBJECTIVES

- Demystify Technical Specifications
- Provide Intelligent, Context-Aware Recommendations
- Deliver Unbiased Side-by-Side Comparisons
- Personalize the Discovery Journey
- Reduce "Time-to-Purchase"

4. PRICE

- Phase 1 - ***Affiliate links*** to **eMAG**, **Altex**, **Flanco**, **Amazon** — you earn **2–5%** on every purchase made through your app. Zero friction to implement.
- Phase 2 - ***Growth***. Freemium model — basic recommendations free, advanced features (price history, compatibility deep-dives, multi-device comparison) behind a ~€3–5/month subscriptionB2B deals — sell the recommendation engine to electronics retailers so their websites use your AI assistant
- Phase 3 - ***Scale***. **Sponsored placements** — brands pay to be "featured" when their product is genuinely competitive (must stay transparent)Data insights — anonymized trend data sold to manufacturers ("students in Romania are prioritizing battery life over GPU")

5. PROMOTION

We will create social media accounts that will promote our product using relatable and informative short-form videos. This is a great and cost-effective approach to sponsoring our app.
